Allied Telesyn International

Simply Connecting the World

Test Title: SNMP Vulnerability
Product tested: AT-8000 Series and AT-8200 Series

Software Version tested for AT-80XX: V3.1.1 and V3.2.0
Software Version test for AT-82XX-XL: V2.4.4

Department: ATI System Test   **Date:** 8-12-03

Objective: Allied Telesyn Sunnyvale System Test Engineering Team has investigated the vulnerabilities in SNMP agent by applying the PROTOS c06-snmpv1 test suite which could be obtained from the www.cert.org or www.ee.oulu.fi.

Conclusions:
The OUSPG did not find any vulnerability in the SNMP agent in ATI products "AT 80XX Series and AT-82XX". Base on the OUSPG test definition of passing, ATI products met all the criteria of OUSPG
